A

GENERAL ATLAS,

DESCRIBING THE WHOLE

UNIVERSE:

BEING

A COMPLETE COLLECTION

OF

THE MOST APPROVED MAPS EXTANT;

CORRECTED WITH THE GREATEST CARE, AND AUGMENTED FROM THE LATEST DISCOVERIES.

The Whole being an IMPROVEMENT of the MAPS of

D'ANVILLE AND ROBERT.

Engraved in the beſt Manner on SIXTY-TWO COPPER-PLATES,

By THOMAS KITCHIN, Senior, and Others.

CONTAINING,

1. 2. A General Map of the World, in Two Hemiſpheres, with the Tracks and all the New Diſcoveries of Capt. James Cook, and other Circumnavigators; with Marginal Delineations of the moſt intereſting Particulars in the Solar, Starry, and Mundane Syſtem.

3. 4. Europe divided into its Kingdoms, States, Republics, &c. with deſcriptive Tables, and many Additions and Improvements.

5. The British Isles, with their reſpective Roads and Diviſions.

6. 7. England and Wales, drawn from the moſt accurate Surveys.

8. 9. Scotland, or North Britain, compiled from the beſt Surveys, and regulated by the lateſt Obſervations.

10. 11. Ireland, with all its Diviſions, Poſt Roads and Canals.

12. The Catholic Netherlands, or Ten Provinces.

13. The Seven United Provinces, with the Canals and Great Roads.

14. France, and its Poſt Roads.

15. Spain and Portugal, from the lateſt Obſervations.

16. Italy, with the Iſlands of Sicily, Sardinia, and Corſica.

17. 18. The Empire of Germany, with the Kingdom of Pruſſia, &c.

19. The Northern States, or the Kingdoms of Sweden, Denmark, and Norway.

20. The Kingdom of Poland, with its diſmembered Provinces.

21. The Whole Russian Empire, in Europe and Aſia.

22. 23. Asia, and its Iſlands, divided into its Empires, Kingdoms, States, Regions, &c.

24. 25. The East-Indies, with the European Settlements, and the High Roads, &c.

26. 27. Africa, with all its States, Kingdoms, Republics, Regions, Iſlands, &c. alſo an Hiſtorical Deſcription, and a Chart of the Gold Coaſt.

28. 29. The Whole Continent of America, divided into North and South, and Weſt-Indies.

30. 31. North America, with the Weſt-India Iſlands, divided according to the Preliminary Articles of Peace, ſigned at Verſailles, 20th Jan. 1783, wherein are particularly diſtinguiſhed The United States, &c.

32. The River St. Laurence, from Fort Frontenac to the Iſland of Anticoſti.

33. The Courſe of the River Mississipi, from the Baliſe to Fort Chartres.

34. 35. South America, with ſeveral Improvements and Additions, alſo a Chart of Falkland's Iſlands.

A GENER
WITH ALL THE NEW DI

The SUN and his Maculæ as seen thro a Telescope

Reasons from Observations of a great Number of these Maculæ or Spots on the face of the Sun they all move in a Parallelism with the Suns Equator in the same Periods of Time therefore it is concluded that they are Bodies on the Solar Ocean and move round the Solar Axis with the Sun

The Sun has been observed to have no Protuberances or any kind of Excrescences near his Centre also his Limb appears free from mountainous Elevations — But near the Limb there appear very often such Strata of heavy Surfaces which disappear near the Centre and in the Limb itself, that they may be taken for real Mountains and Vallies.

The SOLAR SYSTEM.

COMETS or Blazing Stars are Probably of equal General Use and Duration with the Planets. They are dense Bodies generally much less than the Planets but with much deeper Atmospheres which when these Bodies come near the Sun produce a shining Tail opposite to the Sun

The Comet of 1680 according to Sir Isaac Newton in the near of Approach to the Sun was 2000 times hotter than red hot Iron and had it been a Globe as large as Venus and

of Iron so heated quite thro would not have been Cold in 50000 years. The Velocity of this Comet near the Perihelion was 1000 Miles in a Minute and the Length of the Tail 80 Million Miles

Saturn has a large and very broad Ring or Solid Matter encompassing him

Four Satellites are seen revolving round Jupiter as under

Five Satellites which move round Saturn and their Revolutions

Orbit of the Earth &c

Orbit of Venus

Orbit of Mercury

Sun

Saturn and his Ring as seen thro a Telescope

The Ring of SATURN

The Cause of an Eclipse of the Sun and of the Moon

The Diameter of the Penumbral Shadow of our Earth at the Moon is about 4900 Miles

The Diameter of the true Shadow of the Moon at our Earth is 180 Miles

Mercury as seen thro a Telescope

The Dimensions of the SOLAR SYSTEM.	Sun	Moon	Mercury	Venus	Earth	Mars	Jupiter
Mean Distances from the Sun in Millions of Miles			37½	68½	81	129½	424
Diameters in Thousands of Miles	763½	2½	2½	8	8	4½	81
Surfaces compared with the Surface of our Earth	582	1/13	1/6	1	1	1/3	104
Magnitude or Greatness	888	1/50	1/19	1	1	1/8	1065
Quantity of Matter	2067	1/40	1/20	1	1	1/9	214
Weights of equal Quantities of Matter at each Planet	2/3	1/3	2/3	1	1	1/3	2
Densities	¼	1¼	1½	¾	1	⅔	¼
Proportion of Light & Heat	45711	1	7	2	1	½	1/27
Motions per Hour in Thousands of Miles		2½	90	65¾	58	44½	24½
Daily Motions in Degrees and Minutes		13° 9′	4° 5′	1° 36′	59′	32′	5′
Time in which they move round the Sun in Days &c			88	224⅔	365¼	687	4332½
Time in which they move round their own Axes in Days &c	25½	1	1	1	1	1	½
Inclination of their Orbits to the Ecliptic in Degrees		5° 3′	7°	3° 23′	0	1° 51′	1° 19′
Apparent mean Diameters in Minutes or Seconds	32′ 6″	31′ 6″	8″	38″		11″	19″

The SUN is placed near the Centre of the Solar System and the Planets and Comets move round him in Elliptical Orbits the mean Distances whose Cubes are as the Squares of the periodical Times The Spaces thro which the Planets move is void of Matter not having any Sensible Resistance and the General Laws of Gravitation which keeps them in their Orbits is their Gravitation towards each other and the Sun with Forces proportional to their respective Quantities of Matter and the Squares of their Distances respectively

GEOGRAPHICAL DEFINITIONS.

The Poles of the Earth are two Points in the Surface of the Earth or Sea and diametrically opposite to each other. One of which is called the North Pole and the other the South Pole. The Axis of the Earth is a Strait Line drawn from Pole to Pole, and about which the Diurnal Motion is performed from West to East in 24 Hours, whereby the Sun and Stars appear to move from East to West in the same Time. The Equinoctial Line is a great Circle all of its Parts being 90 Degrees distant from either of the Poles. Meridians are great Circles passing round the Earth and thro the Poles. The Sensible Horizon is that which separates between the upper and lower Part of the Sky or Firmament. The Rational Horizon is beneath the Sensible Horizon by a Semi Diameter of the Earth, and parallel thereto. The Tropic of Capricorn are two lesser Circles, the one 23½ Degrees North and the other 23½ South of the Equinoctial. The Arctic Circle and Antarctic Circle are two lesser Circles, the one 23½ from the North Pole the other 23½ Degrees from the South Pole. The Torrid or Burning Zone is the Space of Earth and Sea between the Tropics. The Frigid or Frozen Zones are those Spaces of Earth and Sea between the Arctic and Antarctic Circles and their Poles. The North Temperate Zone is bounded by the Tropic of Cancer and the Arctic Circle. The South Temperate Zone is bounded by the Tropic of Capricorn and the Antarctic Circle. The Latitude of any Place is the Nearest Distance of the Place from the Equinoctial. The Longitude of any Place is the Distance from the Meridian of the Place to the Meridian of another Place where Longitude is supposed to begin reckoning on the Equator. Climates are Spaces of the Earth whose Breadths from North to South are such as to have their Longest Days half an Hour different from each other. Amphiscii are those which inhabit the Burning Zone. Heterocii are those which inhabit the Temperate Zones. Antœci are those which inhabit the Places under the same Meridian. Periœci are those who live in Places of the same Latitude but opposite Sides of the Meridians. Antipodes are those which inhabit the Earth opposite to each other.

The NORTHERN HEMISPHERE

ASTRONOMICAL DEFINITIONS

The Poles of the World are two Points in the Heavens opposite to each other. The Axis of the World is that Line drawn from Pole to Pole. The Equator is a great Circle all of its Parts being equally distant from the two Poles and dividing the Heavens into two Parts called the Northern and Southern Hemispheres. The Ecliptic is a great Circle passing thro' the Equator in two opposite Points and inclined thereto in an Angle of 23½. The Ecliptic contains 12 Signs viz. Aries Taurus Gemini Cancer Leo Virgo Libra Scorpio Sagittary Capricorn Aquarius Pisces. A Meridian is a great Circle passing thro' the Equator and the Poles. The Colures are two Meridians one of which passing thro' the Point where the Ecliptic cuts the Equator is called the Equinoctial Colure the other at 90° ... of the Equator thro' ... is called the Solsticial Colure. The Poles of the Ecliptic are two ... Points ... from the ... Poles of the World

The Latitude of a Star is the nearest Distance of the Star from the Ecliptic. The Longitude of a Star is counted upon the Ecliptic according to the Order of the Signs it terminates where a great Circle from the Pole of the Ecliptic cuts the Ecliptic itself. The Tropic of Cancer is a lesser Circle at the Distance of 23½ from the Equator & 66½ from the North Pole of the World. And the Tropic of Capricorn is a lesser Circle at the Distance of 23½ from the Equator and 66½ from the South Pole. The Arctic Circle 23½ from the North Pole of the World. And the Antarctic Circle is 23½ from the South Pole of the World. The Zenith is the Point over our Heads. The Nadir is the Point under our Feet. The Amplitude of a Star is the Number of Degrees from the East or West where it rises or sets. The Azimuth of the Sun or a Star is the Number of Degrees from the North or South to the Point directly under the Sun or Star. Circles of Altitude are parallel to each other from the Zenith to the Horizon. Circles of Azimuth or Vertical Circles are great Circles drawn from the Zenith to the Horizon. The Altitude of the Sun or a Star is the Number of Degrees it is above the Horizon. The Declination of the Sun or a Star is the Nearest Distance from the Sun or Star to the Equator. Right Ascension is that Point of the Equator which is on the Meridian with the Sun or a Star. Ascensional Difference is the Time from Six o'Clock when the Sun or a Star riseth. Parallax is the Difference between the true & apparent Place in the Heavens.

The Law of Centripetal Motion

The Law of the Solar System

In this Diagram S represents the Sun, P P P &c. the Planets Distances from the Sun, and their periodic times are to the Squares of the Distances as 1 to 1, 4, 9, &c.

A Diagram explaining the simple and double Tides, or how those in opposite Hemispheres are produced by the Moon's Attraction every 12 Hours.

Moon

The SOUTHERN

The Fixed Stars are so called because they keep nearly the same Position and Distance among themselves. The Number of those which have been already accurately observed is no more than 3000. Yet by the help of Telescopes 21 Stars have been seen in the Space which forms the Cloudy Star of Orion's Sword, 36 in that of the Cloudy Star of Pegasus, 78 in the Asterism of the Pleiades and 2000 in the Constellation of Orion. From which it has been conjectured that the Number of the Fixed Stars is no less than 10 Million, beside those of the Via Lactea or Milky Way and such as cannot be discerned by the best Glasses, and that Twice or Thrice that Number would cover the Expanse of Heaven. The bright Star Sirius in the Constellation of the great Dog hath been estimated to be distant from us more than 2 Millions of Millions of Miles. And the Distance of a Star of lesser apparent magnitude hath been found to be more than 20 Million of Million Miles. Wherefore it is concluded that every Fixed Star is a Sun having Planets & Comets moving round it like those which move round our Sun. From all which it may be presumed that of the Universe doth not extend itself beyond the Powers Number Weight and Measure too far for human Reach Light are inconceivably off from the Sun Rate of no Motion ... come ...

THE CAUSE OF THE TIDES EXPLAINED

The Cause of the Tides or Ebbing and Flowing of the Sea was first Discovered by Sr Isaac Newton and is accounted for as follows. 1st Whatever Part of the Earth's Globe the Moon is vertical to the Waters of the Ocean near that Place rise upward above their usual Surface by their Gravitation toward the Moon which the Lands near the same Place would also do in like manner were they not firmly held together by the Force of Cohesion. 2d The Gravitation of the Earth toward the Moon is as the Gravitation of a Mass of Matter equal in magnitude to the Earth and concident with the Centre of the Waters Globe. 3d The Gravitation of the Waters in the opposite Hemisphere to where the Moon is vertical is less than that of the Earth itself. And therefore those Waters of the opposite Hemisphere will recede from the Earth's Centre. 4th Hence it is natural to follows that wherever the Moon is vertical the Ocean will rise & form Tides in Rivers, and that it will be nearly the same in that Place of the Earth diametrically opposite thereto on the other side of the Earths Globe. 5th Thus Theory is confirmed by Observation for there is a double Tide every 24 Hours at all Places where the Tides are in the Face of our Globe. The mutual attraction of the Earth and Moon would soon bring them together, were it not for the Centrifugal force which they acquire by moving round their common Center of Gravity once in every Month. Let M be the Moon, Z a Nt the Earth, C its Center, and G the common Center of Gravity between the Earth and Moon. Z is the place where the Moon is in the Zenith, and N the place where she is in the Nadir. As the points Z, C and N revolve about G, all in the same periodical time, their Centrifugal forces (or tendences to fly off from G) are directly as their distances from G. The Moon attracts strongest at Z, being nearest to it, weakest at N being furthest from it, and at a mean between both at the Center C. But the Moons attraction most balances the centrifugal force at C, wherefore it is greater than the Centrifugal force at Z, and less than the Centrifugal force at N. Consequently the water at Z will rise toward the Moon by the excess of her attraction and will recede the contrary way at N by the excess of its centrifugal force, so that the Tides will be equally high both at Z and N and as the Earth turns on its Axis the different places there of will come successively to the high water at Z and N and to low water at A and B.

A Diagram for shewing the simple and double Tides, or how those in opposite Hemispheres are produced by the Moon's Attraction every 12 Hours.

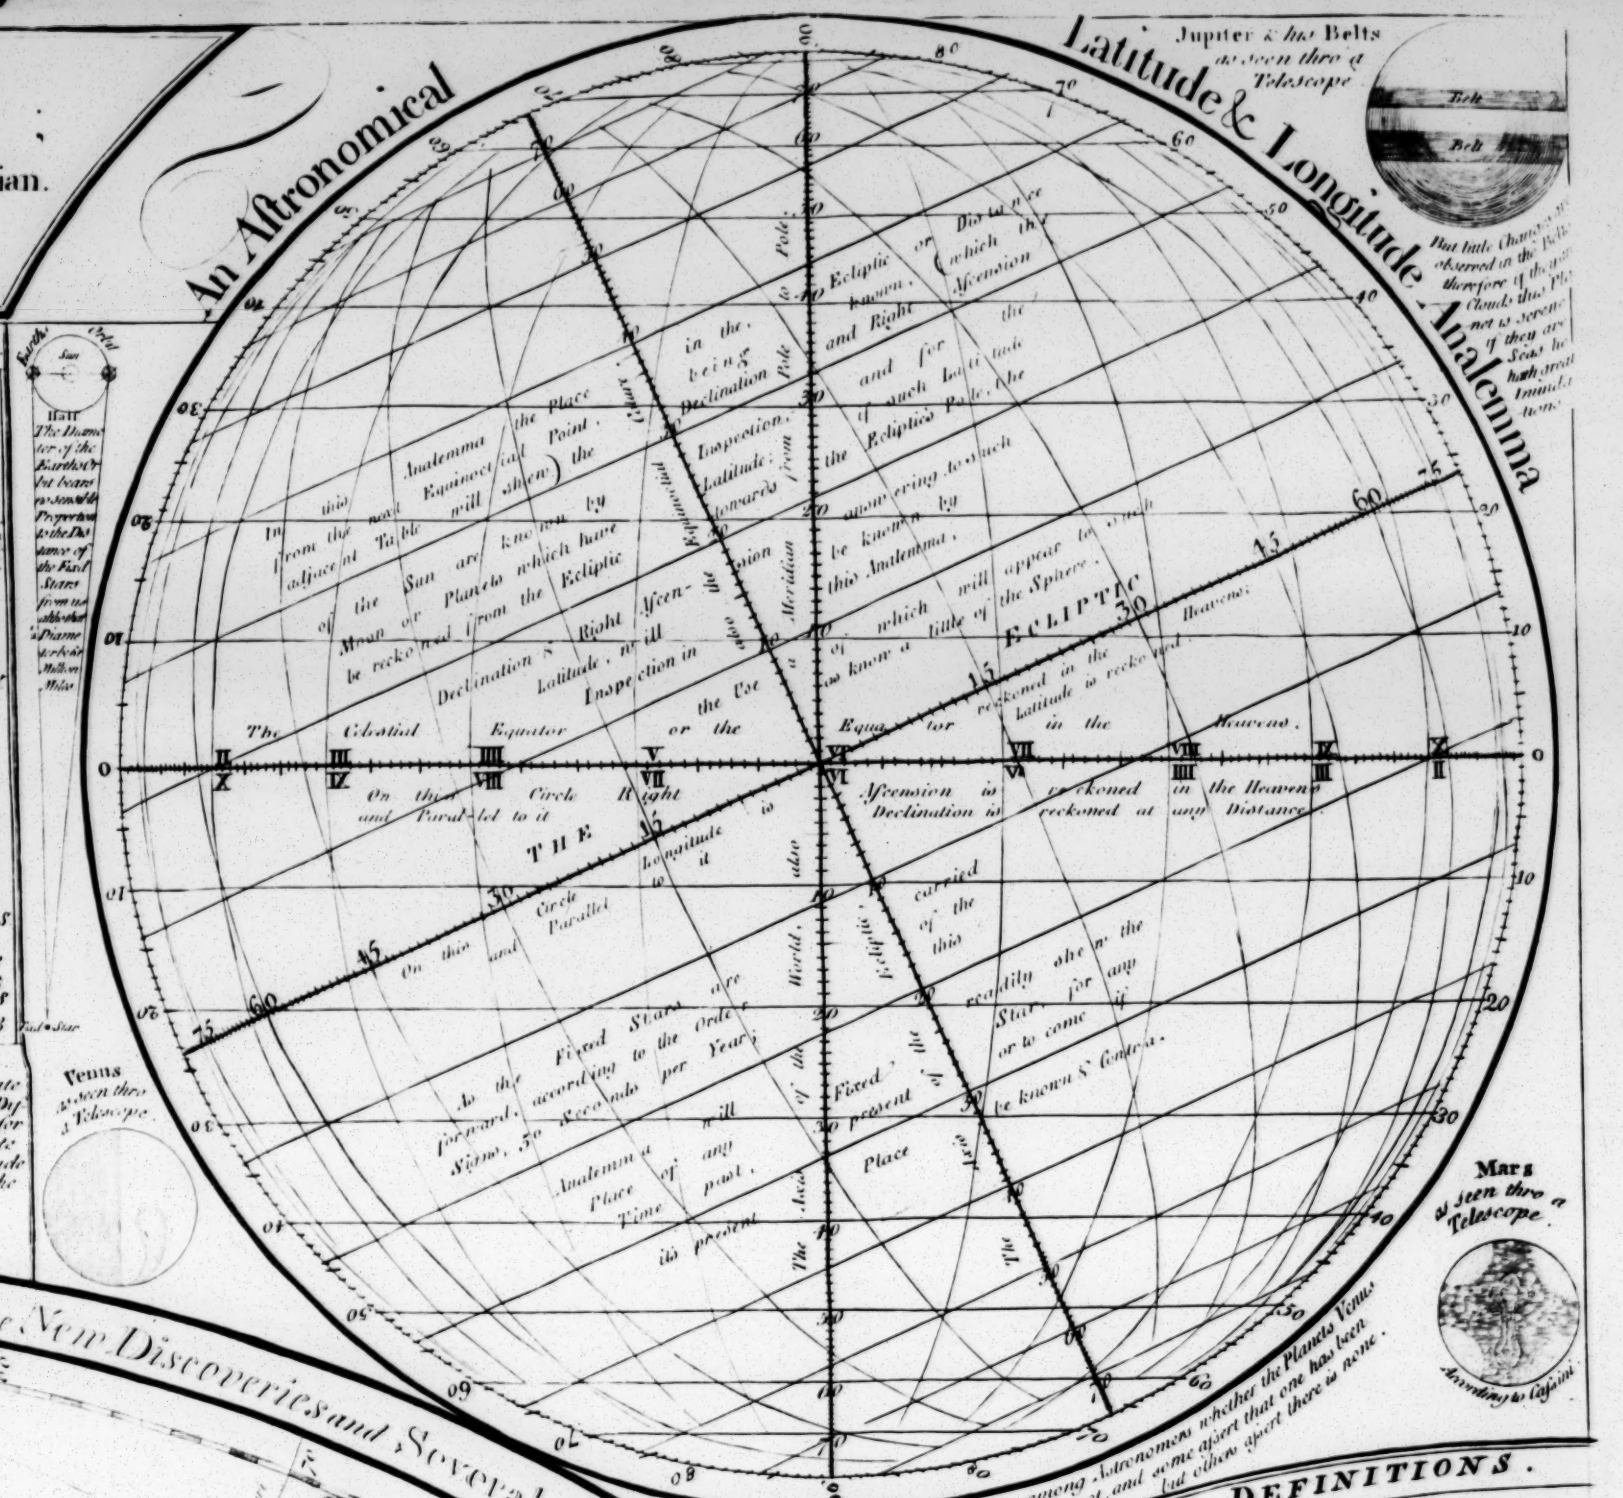
In the above Table the Suns Place in the **Ecliptic** *is shewn for the Beginning & Middle of each Month in the Year, that for the intermediate Time may be found by proportioning the Difference of Days to the Difference of the Suns Longitude. In the same manner may the* **Declination** *for intermediate Days be found although it will be more exact to compute the same by this Proportion. As* **Radius** *: to Sine of Suns Longitude :: so is Sine of 23° 28′, the present Obliquity of the Ecliptic : to the Sine of the Suns Declination for that Longitude given.*



It has been long a Question among Astronomers whether the Planets Venus and Mars have any Satellite or not, and some assert that one has been seen attending Venus, but others assert there is none.

The ART of DIALING by a common GLOBE

On the Opposite part of the Map we have shewn how to make a Horizontal Dial for any given Latitude. The same rule holds for an erect South Dial only instead of elevating the Pole to the Latitude of the Place it be elevated

to the Co Latitude and the hours reversed on the plane of the Dial Thus suppose the North Pole P to be elevated above the North Point of the Horizon at XII. equal to the Co Latitude of the Place then if the Globe be supposed to be cut flat and close by the Horizon and right Lines be drawn from the Center C to these points in the Horizon the Meridians cut it they will be the hour lines of a Dial (fronting the South and above figure it will be the South Dial) where the

This Chart or Map of the World on the Right hand called Mercators Chart was the inven tion of Edward Wright an English Man commonly called Mr. Mercator a Flemmer was the first who put in Navigation beyond all others that it shews what parts of the Earth or Sea either a Trad ditter or a Ship must pass over to proceed from one Place to another and keeping always the same Course with respect to North and South.

The Arts of such a Scale as is Underneath with the help of a Pair of Compasses Parallel Rulers Dividers &c. is performed by a Scale of Equal Parts, Chords, Sines, Tangents, Secants &c. Now as the Radius or Sine of 90 Degrees is the greatest of all Lines in a Circle therefore has been thought proper to accompany a Map of the Sphere with a Scale of Equal Parts, Chords, Sines, Tangents, Secants &c. to one radius whereby the Chord lines are made Equal Parts by their inward Concentric Quadrants by which also the Radii are Secants. The Semitangents may easily apply it further.

AN UNIVERSAL SCALE,

of Equal Parts, Chords, Sines, Tangents, Secants &c.

A CHART OF THE WORLD

according to

MERCATOR's PROJECTION

With the Rhumb Lines

As the Space to which we are here confined for illustrating the Use of this UNIVERSAL SCALE is very small we can only give a few Problems thereon in this Place leaving the further Application thereof to the Ingenious If BA represent a Wall two Feet high and Ax the Breadth of a Ditch 35 Feet broad the length of a ladder from X to B being measured on the Scale AC will measure 14 Feet. — If a Line of any Length as for Example this carry it along parrellel to m n so at p q it will be intercepted and 25 in the Scale is the Answer. This Problem is of such Use that it measures the Dimensions of Countries, Islands &c. in any Par

The most material Arguments in Favour of a Lunar Atmosphere seem to be those of the not instantaneous Loss or Gain of Light in the Occultation of Fixed Stars by the Moon, and according to several Observations in England as well as Abroad on the 6th of June 1761 whilst the Planet Venus was on the Disc of the Sun, she appeared to have an Atmosphere, of which a full Account may be seen in the Philos. Trans. So that for these and some other Reasons probably the Moon has an Atmosphere.

Althó the Moon always presents nearly the same Face towards Us, whilst she is moving round our Earth in the Space of 27 Days 8 Hours, and also turning round her own Axis in the same Time, Yet she has another Motion, whereby when she hath made a fourth Part of her Revolution round her Axis, and not described a fourth Part of her Orbit at the same Time, those Spots near the East Edge of the Moon do appear advanced on her Face, and the opposite Ones withdrawn. The Contrary also happens in an opposite Part of her Orbit, This is Called the Moons Libration.

The VICISSITUDE of

In this Diagram S represent the Sun. A XII B XII the Earth as moving round the Sun in the plane of the Ecliptic according to the Order of the Signs Aries Taurus Gemini &c. P is the North Pole. C the Arctic Circle. T the Tropic of Cancer. E the Equator. A XII B the enlightened half of the Earth, where it is Day. B XII A the darkened half where it is Night and BC A is the boundary of light & darkness. The Earths position with respect to the Sun is here shewn at the beginning of each Sign of the Ecliptic and here 'tis plain that as the Earth moves through the Signs Libra Scorpio Sagittarius Capricornus Aquarius and Pisces (which is from the 21st of March till the 23d of September the North Pole P is constantly enlightened, and the Northern Places have their days longer than their Nights. But as the Earth proceeds through Aries Taurus Gemini Cancer Leo and Virgo which is from the 23d of September till the 21st of March the North Pole is constantly in the Dark, and the Northern places have their Nights longer than their Days.

of those Degrees cut in the Limb, to the Radius AB, and Aa are their Cosines. In like manner Ac are Sines of the Arches cut by the Cosines cc to the same Radius AC. Count from B to m &c. and set the given Line from m to n laying a Strait Slip of Paper with its Edge passing from B by n; then to know the measure of a Oblique short Distances, would otherwise require a Sector or Calculation to regulate them. The same is also alike applicable to the Parts of the Maps of the Moon

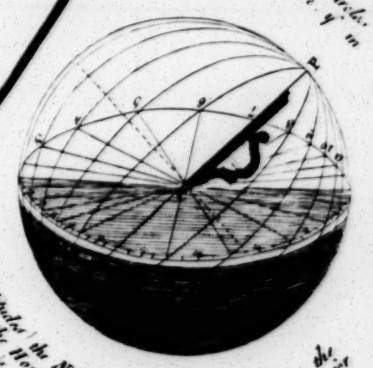
ANTARCTIC or SOUTH POLE

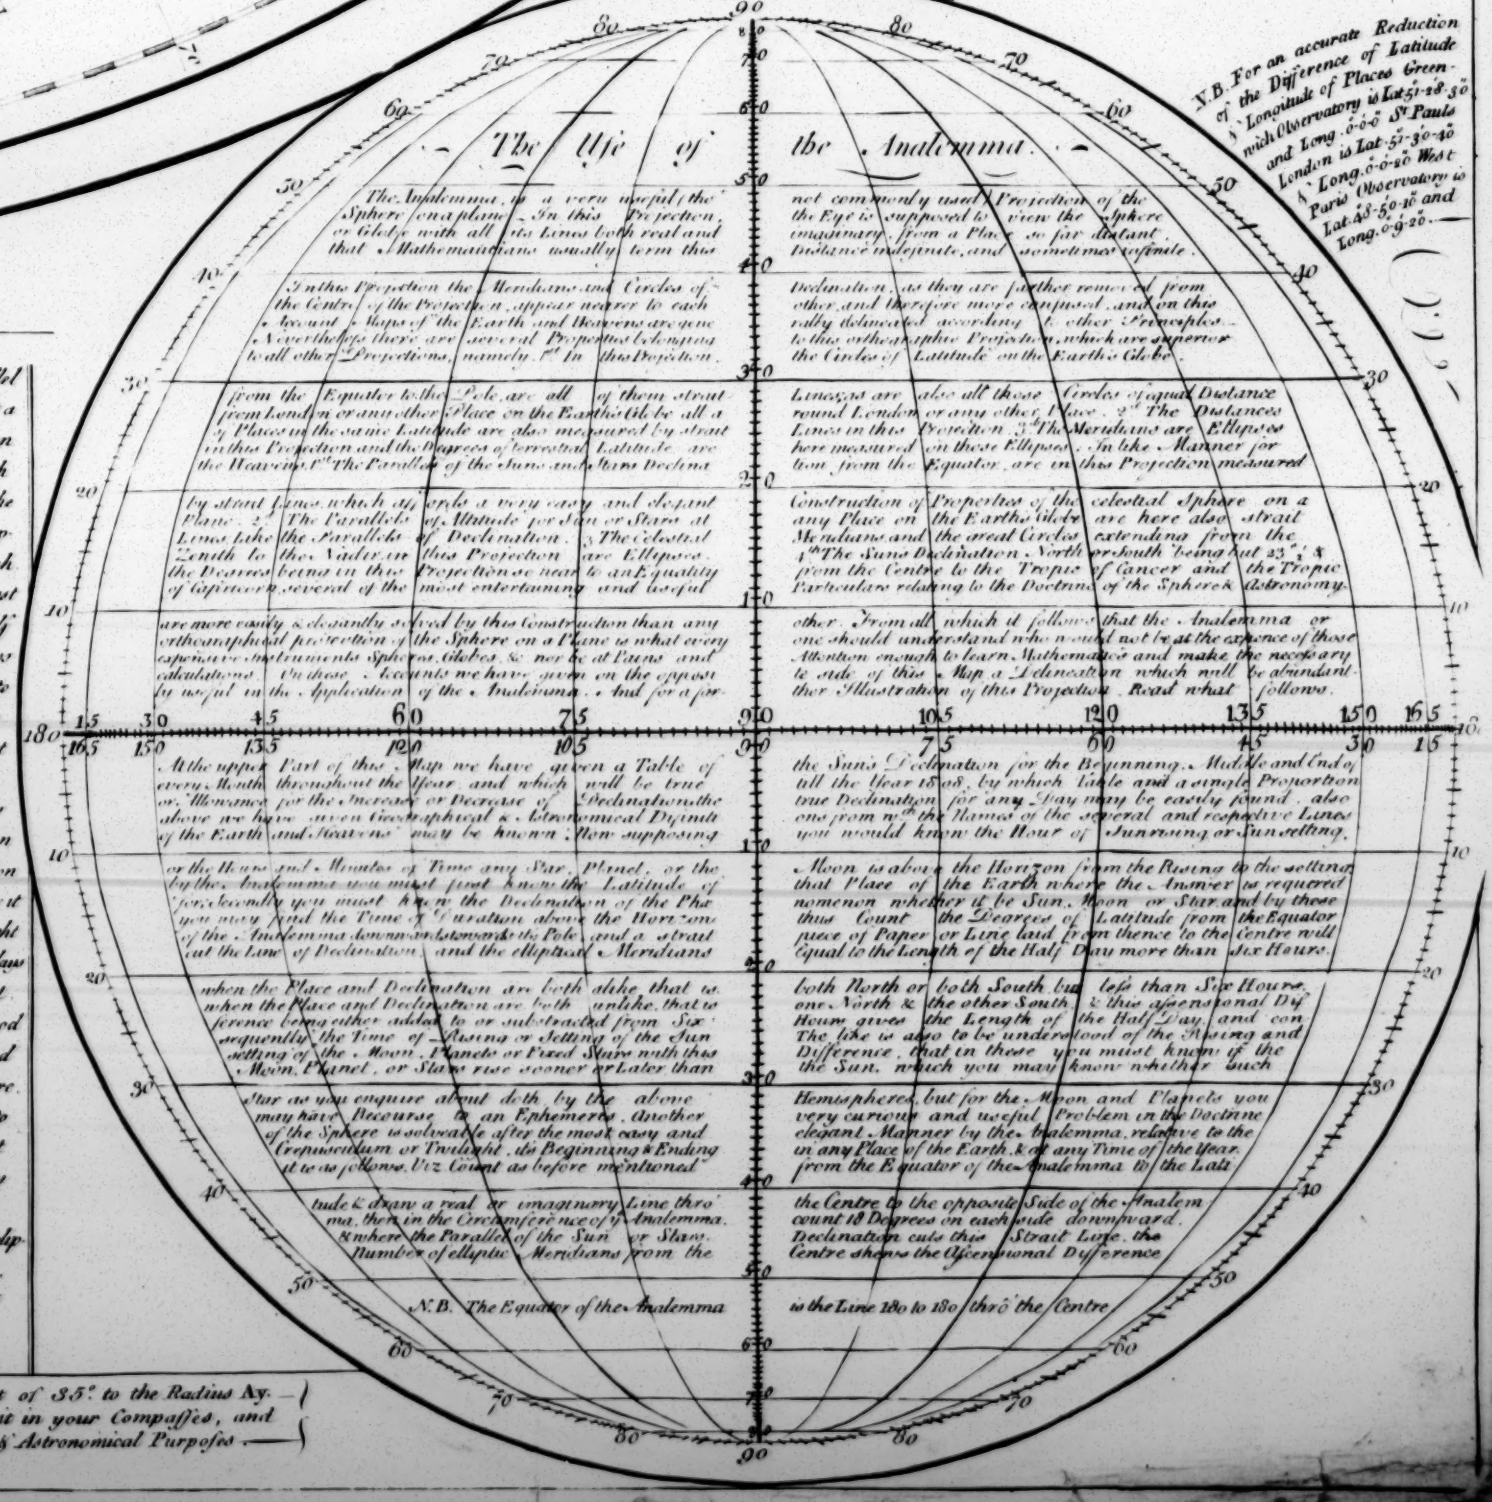
The ART of DIALING by a common GLOBE.

If 24 Meridian Lines are delineated on a Globe, as that is generally the Number on Nine Inch Globes at 15 degrees from each other, they will be hour circles for all Latitudes. Therefore if in



Northern Latitudes the North Pole P be elevated above the North point of the Horizon equal to the Latitude of the Place for which the Dial is intended to serve, and one of the Meridians brought to the North point of the Horizon at the proper distance of the other Meridians will cut the Horizon XII VI 12 6 at XII all the respective hours from XII at Noon, and the elevation of the Axis CP above the Horizon will be equal to the elevation of the Still above the Plane of the Dial. Thus if we suppose such a solid Globe to be properly elevated and then the upper part cut off close by the Horizon, leaving the Centre C, these Points of the Axis standing, and drawing straight Lines from the Northern half of the Horizon where the Meridians cut it they will be the true hour lines of a Horizontal Dial and the Axis CP will be the Gnomon

The ANALEMMA



N.B. For an accurate Reduction of the Difference of Latitude & Longitude of Places Greenwich Observatory is Lat 51-28-30 and Long 0-0-0 St Pauls London is Lat 51-30-40 Long 0-0-20 West Paris Observatory is Lat 48-50-10 and Long 0-9-20

The Use of the Analemma.

The Analemma is a very useful Sphere on a plane, or Globe with all its Lines both real and imaginary, from a Place so far distant that Mathematicians usually term this not commonly used Projection of the Sphere the Eye is supposed to view the distance indefinite, and sometimes infinite.

In this Projection the Meridians and Circles of Declination, as they are farther removed from the Centre of the Projection, appear nearer to each other, and therefore more compound. And on this account the Maps of the Earth and Heavens are generally delineated according to other Principles. Nevertheless there are several Properties belonging to this orthographic Projection, which are superior to all other Projections, namely 1st In this Projection the Circles of Latitude on the Earth's Globe.

1st From the Equator to the Pole are all from London or any other Place on the Earth's Globe all of them streight Lines which also of Places in the same Latitude are also measured by streight Lines 2d The Parallels of Altitude for Sun or Stars at in this Projection and the Degrees of terrestrial Latitude are the Heavens 3d The Parallels of the Suns and Stars Declina-

Lines also all those Circles of equal Distance round London or any other Place. 2d The Distances here measured on these Ellipses. In like Manner for from the Equator are in this Projection measured

by streight Lines which also Angles a very easy and exact Plane. 2d The Parallels of Altitude for Sun or Stars at Lines like the Parallels of Declination. 3d The Celestial Zenith to the Nadir in this Projection are Ellipses. the Wearers being in this Projection so near to an Equality of Capricorn several of the most entertaining and useful

Construction of Properties of the celestial Sphere on a any Place on the Earth's Globe are also streight Meridians and the great Circles extending from the 4th The Suns Declination North or South being but 23½ from the Centre to the Tropic of Cancer and the Tropic Particulars relating to the Doctrine of the Sphere & Astronomy.

are more easily & decently solved by this Construction than any orthographical projection of the Sphere on a Plane is what every expensive Instruments Spheres, Globes, &c nor be at Pains and calculations On these Accounts we have given on the opposite useful in the Application of the Analemma. And for a per-

other. From all which it follows that the Analemma or one should understand who would not be at the expence of those Attention enough to learn Mathematics and make the necessary to side of this Map a Delineation which will be abundant-ther Illustration of this Projection. Read what follows.

At the upper Part of this Map we have given a Table of every Month throughout the Year, and which will be true or Almanac for the Increase or Decrease of Declination of the above we have given Geographical & Astronomical Points of the Earth and Heavens may be known: Now supposing

the Sun's Declination for the Beginning, Middle and End of till the Year 1808, by which table and a single Proportion true Declination for any Day may be easily found, also one from 90° the Names of the several and respective Lines you would know the Hour of Sunrising or Sunsetting.

or the Hours and Minutes of Time any Star, Planet, or the by the Analemma you must first know the Latitude of for Secondly you must know the Declination of the Place you may find the Time & Duration above the Horizon of the Analemma downwards towards the Pole, and a streight cut the Line of Declination and the elliptical Meridians

Moon is above the Horizon from the Rising to the setting that Place of the Earth where the Answer is required nomenon whether it be Sun, Moon or Star and by these thus Count the Degrees of Latitude from the Equator piece of Paper or Line laid from thence to the Centre will Equal to the Length of the Half Day more than Six Hours.

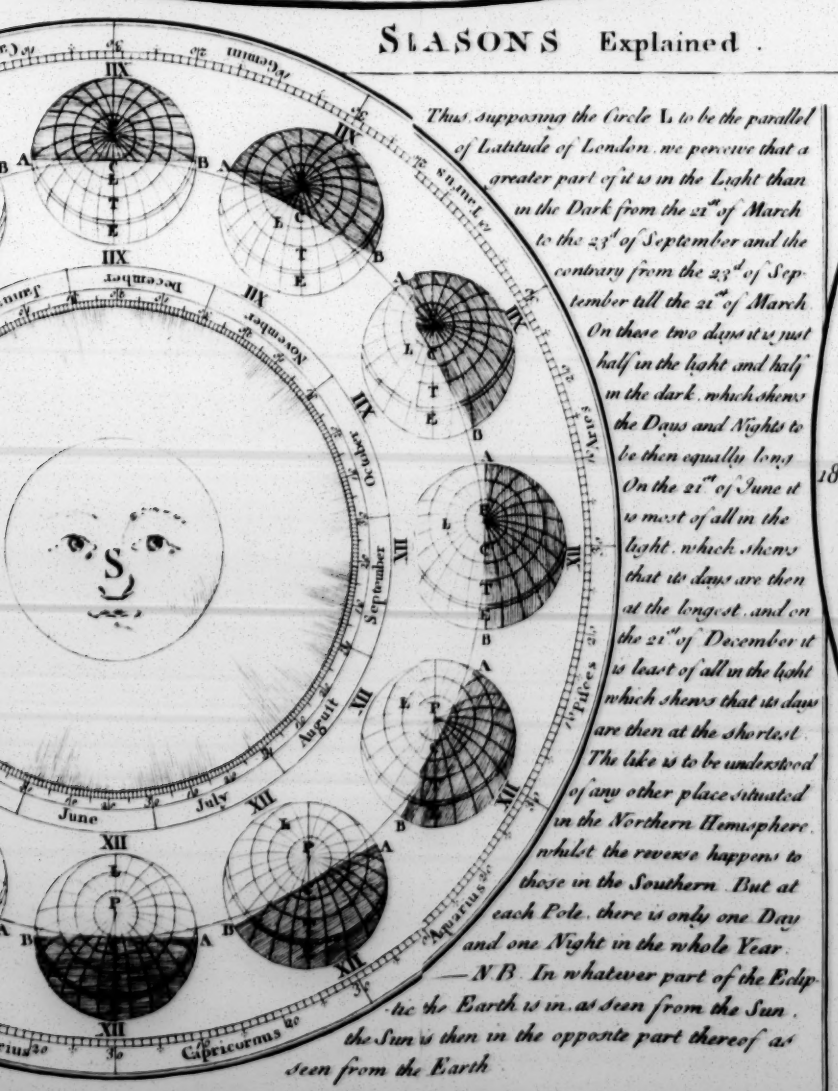
when the Place and Declination are both alike, that is both unlike, that is both North or both South but less than Six Hours, ference being either added to or substracted from Six one North & the other South & this ascensional Difference quently the Time of Rising or Setting of the Sun Hours gives the Length of the Half Day and con-setting of the Moon, Planets or Fixed Stars with this The like is also to be understood of the Rising and Moon, Planet, or Star so rise sooner or Later than Difference, that in these you must know if the the Sun, which you may know whether such

Star as you enquire about doth by the above Hemispheres, but for the Moon and Planets you may have Recourse to an Ephemeris. Another very curious and useful Problem in the Doctrine of the Sphere is solvable after the most easy and elegant Manner by the Analemma, relative to the Crepusculum or Twilight, its Beginning & Ending in any Place of the Earth, & at any Time of the Year, it is as follows, Viz Count as before mentioned from the Equator of the Analemma to the Lati-

tude & draw a real or imaginary Line thro' the Centre to the opposite Side of the Analemma, there in the Circumference of the Analemma count 18 Degrees on each side downward. & where the Parallel of the Sun or Stars Declination cuts this Strait Line, the Number of elliptic Meridians from the Centre shews the Ascensional Difference

N.B. The Equator of the Analemma is the Line 180 to 180 thro' the Centre

SEASONS Explained.



Thus supposing the Circle L to be the parallel of Latitude of London, we perceive that a greater part of it is in the Light than in the Dark from the 21st of March to the 23d of September and the contrary from the 23d of September till the 21st of March. On these two days it is just half in the light and half in the dark, which shews the Days and Nights to be then equally long. On the 21st of June it is most of all in the light, which shews that its days are then at the longest, and on the 21st of December it is least of all in the light which shews that its days are then at the shortest. The like is to be understood of any other place situated in the Northern Hemisphere, whilst the reverse happens to those in the Southern. But at each Pole, there is only one Day and one Night in the whole Year.

— N.B. In whatever part of the Ecliptic the Earth is in, as seen from the Sun, the Sun is then in the opposite part thereof as seen from the Earth.

same Radius AC. xy is the Tangent of 35° to the Radius Ay. AZ is the Secant of 35° to the Radius Ay. — the measure of any other Line suppose this Line viz. ——— take it in your Compasses, and Maps of the Moon & Stars, Mercators Chart, the Analemma, & other Geographical & Astronomical Purposes. ———

EXPLANATION
of the following
TABLES.

1. They shew the Boundaries Situation Length Breadth and Superficial Contents of Europe.
2. The Principal Empires, and Kingdoms, their Particular Length Breadth Long. Latt. and Area in Square Miles the Site of each Chief City, and its Distance from London.

Great Britain *being Advantageously Situated, & having many Navigable Rivers affords Excellent Harbours for Shipping, which last are very Numerous, & may be distinguished thus into two parts, the one for Defence, the other for Commerce.*

The first, or Royal Navy *is very formidable, both for Strength of Material, being built with the best the World can produce, the growth of this happy* Island, *& in being Manned with the Sons of Liberty. Who must be Vanquished before any considerable Descent can be made to annoy the Inhabitants, which is rendered still more precarious of late, by the revival of a well Disciplined Militia, assisted with a few Bods of Regulars to dispute an Enemies Progress in Case the Marine Opposition should fail.*

The Commercial part Trade to all Parts of the known World & from thence import the produce of every Clime, both for Ornam.t or Utility. To the British Diadem may also be annexed its vast Territories in America &c &c &c.

North Britain *or* Scotland contains

Sq Miles in Area	27120	Provincial Synods	13
Ds in the Isles adjoining	1863	Presbyteries	68
Length	153	Universities	4
Breadth	274	Seats Peers to Brit Parl.t	16
Shires	3	Ds Commoners	45
Parishes	938		

Scotland *exclusive of the Islands adjoining is less than* Ireland *3100 Sq Miles.*

The Inhabitants are universally allowed to be a Brave & Warlike People, of which they have given great Proof by their Loyal & Integral Behaviour in all the Wars.

The this Country in General be not so fruitful as the Southern part of Britain, being more fit for Pasturage than Corn Yet in some of the Inland Counties, they have good store of Grain wherewith they Trade to Spain, Holland, and Norway.

But for Black Cattle & Sheep, it Produces vast Numbers of w.ch they Send annually great Droves to England.

Their Linen Manufactory & Fishery are also very Considerable.

The Happy Union of this Part of Gr Britain w.th England was effected in 1707.

EUROPE
Divided into
ITS EMPIRES, KINGDOMS, STATES
REPUBLICS, &c.

BY THO.s KITCHIN, Hydrographer to *THE KING*,
with many Additions and Improvements
from the latest Surveys and Observations.

Germany Continued

This Empire is full of Sovereign Princes & Counts or rather Prime Nobility every one of whom is more free & absolute than Several crowned Heads.

So much Power has been looked upon by Several Emperors as an evil Eye but they have not dared to dissolve or impair it for fear of distracting all Germany & ruining themselves into the Bargain & therefore every Emperor at his Coronation does not Scruple to confirm all these Rights & Privileges to the Empire. Their exact Number cannot be fixed because upon the Death or Extinction of their Families their Estates & Rights devolve to others so that 'tis no extraordinary Thing for one Prince to have two or three Votes in the Diets

The Number of those who have a right at this Day to sit in the Diet of Ratisbon are Computed to be at least 200

Of this Sovereigns next to the Emperor are the 9 Electoral Princes then the Dukes of Lunenburg Mecklenburg Lanraviae of Hesse &c the Princes of East Friesland Anhalt &c the Counts of Nassau Solms with many others as the Archbishop of Saltzburg the Bishop of Munster Liege &c together with some Abbots & the great Master of the Teutonick Order &c.

These have Sovereign Authority in their own Estates & govern their Subjects without cognisance of the Emperor.

Poland

But as the Dismemberment was divided into 4 Parts the whole Contains 210,235 Miles

Provinces	Capitals	dist. from Warsaw	dist. from London
Lesser Poland	Cracow	160	840
Greater Pol.	Gresna	140	738
Polish Prussia	Dantzick	180	790

Courland	Mittau	308	990
Warsovia	Warsaw		840
Red Russia	Lemberg	195	1003

King. of Prussia *belongs to the King of Prussia held as a Fief of the Crown of Poland.*

The Poles live under one Head who bears the Title & lives in the Splendor becoming a King but his Power is so Circumscribed that in Effect he is no more than the Prime or Chief Regent of a Commonwealth since he can do nothing without the Bounds of that Authority which the Laws of the Land have given him which Constitution the Nobles take care to maintain. This King is chosen by a free Election where every Nobleman Present has his Vote

Denmark *contains 19402 Square Miles*

Provinces	Capitals	dist. from Copenhagen	dist. from London
Slesvick	Slesvick	133	460
Jutland	Wyburg	146	510
Isle of Zealand	Copenhagen		595

Wardhus	Wardhus	1143	1027
Bahus	Bahus	159	640

Denmark *may be comprehended in two parts viz the Peninsula annexed to the Continent of Germany & the other parts of the Kingdom the Islands of Zealand Funen Langland Laland Falster Bornholm & many others of less Note*

Norway *was annexed to the Crown of Denmark by the Marriage of Haquin King of Norway with Margaret Daughter of Waldemar the 3d King of Denmark in the Year 1281. since which Time Norway has been governd by a Viceroy appointed by the King of Denmark.*

The Island of Iceland also belongs to Denmark it lies under the Artic Circle. Contains 53346 Square Miles It is very barren & unfruitful on the S.E part of this Island near the Sea is the famous Vulcano Mount Hecla: and the Small Islands of Ferro 24 in Number pertain to Denmark

Sweden *is Divided into 7 Provinces the whole contains 267296 Sq. M.*

Provinces	Capitals	dist. from Stockholm	dist. from London
Sweden propr.	Stockholm		895
Gothland	Calmar	198	768
Ingria, Livonia	Yielded to the Russians for ever by the Treaty of Nystad 1721		
Findland	Abo	169	1700
Swedish Lapland			
Gothland	Wisby	113	797
Oeland	Borkholm	179	790

The Province of Ingria was formerly Subject to the Muscovites & afterwards yielded to Sweden under Gustavus Adolphus to whom it was entirely resignd by the Czar Michael Federowitz in the Treaty of Stockholm 1618 which was confirmd in 1661.

But the Muscovites took it again under the Czar Peter the Great in the Beginning of this Century together with the Province of Livonia so that both these Provinces now belong to the Russian Empire being yielded by the Swedes to the late Czar by the Treaty of Peace Signd at Nystadt in Finland Aug.t 30th 1721. And also great part of Finland has since been Ceded to the Russians

Sweden *abounds with almost innumerable Islands among the Lakes & on the Sea Coast whereof above Six Thousand are Inhabited: The rest are either bare Rocks or overgrown with Woods Part of Pomerania in Germany belongs to the Swedes.*

Rusia in Europe *is divided into 17 Provinces the Whole containing 1171733 Square Miles.*

Friesland	*Leeuwarden*	72	260
Groningen	*Groningen*	87	285

Of these Provinces the first that entered into an Alliance for their common Safety were Holland & Zealand Anno 1576. Being driven thereto by the Cruel & Violent Usage they met with from the Spanish Government

The Example of these two Provinces drew several others to unite with them, so that in 1581. the Seven Provinces took up Armes against the Spaniards under the Conduct of Maurice Prince of Orange who by the Assistance of Providence & the Succours from England & France retrieved the Affairs of ye States & forced their haughty Masters to acknowledge them a free & independent People

From such a small Beginning they are growen the most Famous Republic in the Universe

ST GEORGES CHANNEL

ELAND *called by the Latins* **Hiberma** *and by the Natives* **Erin** *is the largest Island in*
e except **Great Britain** *its Area or Superficial Content is by the nearest Computation found*
to 7712 Irish Plantation Acres which makes 17927804 Acres of English Statute Measure its
ortion is with **England** *and* **Wales** *as 18 to 32*

illiam Petty in his **Political Anatomy** *of* **Ireland** *reckoned the Number of People in that King-*
dome 1672 to be about 1100,000 and it is Computed that it contains now above Two Millions

limate of Ireland is very Temperate The Soil very fertile and the Air so pure that no Venemous
al can Live in it.

Civil & Ecclesiastic Government of the Kingdom is divided into four Archbishopricks viz. **Armagh**
Cashill *and* **Tuam** *who have under them 18 Suffragant Bishops several of which have 2 or*
shopricks United into its provinces & County

Temporal Government which is like that of England is divided into 5 **Circuits** *viz.* **Leinster**
ter Connaught North East *and* **North West** *which comprehends 31 Counties each of them*
ivided into several Districts and Baronies besides the County of Dublin which is not
y Circuit

n *the Metropolis of the Kingdom is a fair and well built City, pleasantly Seated near*
ge Harbour on the Mouth of the River **Liffy** *which separates betwixt the City and North Suburbs*
h have Communication by five great Stone Bridges. It is both large and Populous and is
posed to contain about 10,000 Houses and in them at least 100,000 Souls it is adorned
several fine Structures as the **Kings** Chappel *called Christ* Church, *the ancient Cathedral*
Patrick, *the Kings Castle which is the Residence of the* **Lord Lieutenant** *or Vice Roy of the*
dom, the **House** *of* **Parliament** *the* **Barracks** *the* **Trinity Colledge** *&c.*

other Places of Note are **Corke** *a large and Rich City* **Waterford** *a noted Sea Port* **Galway**
gheda *and* **Belfast** *Sea Towns* **Limmerick** *and* **Londonderry** *places of great Strength fa-*
s for the Sieges they have Endured.

AFRICA *is of a* Pyramidal *or* Triangular Figure *the base whereof is the* Northern Part *of it. It is a* Peninsula *Joind by the narrow* Isthmus *of* Suez *to* Asia *& situated between 37 degrees of North latitude & the 35th of South lat: Thus Quarter of the* World *once contained several* Kingdoms & States *eminent for the* liberal Arts, Wealth, power & *the most* extensive Commerce, *tho at this day there is Scarce one Single Nation left upon that* continent *that deserves our notice, but those who are on the Sea Coasts: We are to give their description according to their division Viz: in* outward *and* Inward Lands.

THE PRINCIPAL OUTWARD PARTS OF AFRICA.

NORTHERN PARTS.

I. **Barca** *Subject to the Bashaw of* Tripoli *a barren Country like a parched Desart, tho that part which is contiguous to* Tripoli *is tolerably fruitfull. It extends along the Mediterranean fr.m* Tripoli *to* Egypt *& is about 200 Miles broad where broadest. there is very little difference between its Inhabitants & those of adjacent Countries which we are to describe.* II. **Barbary.** *This contains many small Kingdoms & States among which the Europeans distinguish* Tripoli, Tunis, Algiers, Fez *& Morocco. All these States are in perpetual War with the Christians and above all with the Knights of Malta.*

Tunis *&* Tripoli *are under the same* Dey *who is himself Subject to a Turk Bashaw. These Countries breed abundance of Camel & fine Horses, produce Corn & Olives plentifully, In* Tripoli *they have exceeding fine Wool & in* Tunis *a good Manufacture of Soap. As Mulberry Trees thrive prodigeously in both, no Country is more proper for Silk though it is little Cultivated. The* Turks *who live there, are Clothed like those of Constantinople & have their Vests frequently made of English Cloth. Near* Tunis *is a small place wherein the ancient city of* Carthage *stood & not very far from it a place called* Byserta, *said to be the ancient Hipparus thus, near which the place now called Boon halter, is believed to be the ancient Utica so famous by the Death of Cato. The other places are Porto farina an exceeding good Harbour on the Mouth of a River which is the ancient Bagrada. The Inhabitants of* Tunis *keep there Gallies & other Ships. Bisperta & Goletta formerly taken by Charles V & held by the Christians till 1574. Near Sea Coast & the Borough of* Zaune *there is a small Island called* Tabarca *which belongs to the Genoese who have a strong fort with a Garrison. Their settlement is for Coral fishery, in paying a Duty to y.e Bashaw of* Tunis & Algier *Cape Negro is 18 leagues distance from Tabarca & in the possession of a French Company who have a Settlement of Merch.ts with a small garrison in the Fort. They pay tribute to* Tunis. The Kingdom of Algier *is usually divided into 3 provinces Viz.t Tremezen, Tenez, Algier Bugia, Constantina. The Town of* Oran *lies in* Tremezen *& belongs to the Spaniards who retook possession of it in 1732 after having been dispossess'd since y.e Year 1708. they retook also Marzalkabir which lies at a League distance from Oran. The Harbour of Oran is reckoned the finest & best of* Africa. *The French are in possession of a Fort called y.e Bastion of France & have a Settlement there for Coral fishery on the paying of a Duty to the government of* Algier. *Bona formerly* Hippona *lies in* Constantina. *These Countries abound in Corn & fruits as Dates, Olives, Figs, Grapes. They have also Wax, Honey & Salt. The Militia who Elect their Dey at* Algier *are all natural Turks, or Renegadoes & may amount in all to about 12000 Men. These Troops are by some stild the Nobility of* Algier. *Certain it is that the frequent revolutions that happen at* Algiers *are brought about by this days of pleo the Algerines are more formidable at Sea than any other power on y.e Coast of Barbary & their Sea faring people are in great esteem on account of the Prizes they frequently bring in. Europeans Import there Silks, Gold & Silver Stuffs, Linen, Woolen Cloth, Sails & naval Stores. Wine, Brandy, Paper &c. & export Wax, fine Wool, Skins, Ostrich feathers, Christian Slaves &c The Empire of* Morocco *contain 3 Provinces Fez Morocco & Suz. The Portuguese have Lost the Town of* Magazan *which they possessed upon the Coast. Salle or* Rabat *the chief piratical Port is esteemed the best of the Emperor of* Morocco *whose Residence was before 1755 at* Mekinez *situated in a delightfull Plain between Fez & Salle. But this unhappy town having been almost overthrown by the same Earth quake which destroyed* Lisbon, *the Emperor Resides now at* Marocco. *The air of the country is Temperate & they Complain oftener of Cold than Heat. It freezes sometimes very hard in January & February. All Money affairs & foreign trade are negociated and carried on by Jews Their principal employment at* Marocco *is working in Gold & Silver & Changing of money & lending it upon usury. Here also is since the fall of Mekinez a Convent of Spanish Fryars call'd Trinitary endowed with a Revenue of 300 Pistoles a Year for the relief of captives both with food & Physick & for preventing their turning Mahometans. The Blacks alone have the Administration of the Government. The habit of a Moor is a linen Shirt or frock next his Skin, a pair of drawers, a Sash & over all a loose Coat or Vest of Silk or Cloth of England with small Buttons of Gold or Silver or Metal. They Shave their Heads all but one single lock upon the Middle of the Crown & wear a Turbant which is never pulled off before their Superiors & even in Temples. The Habit of a Woman is not very different from that of a Man, when they go abroad they have a linen Cloth over their faces with holes in it for their Eyes like a Mask.* III. **Zanhaga.** *to which our Mariners formerly gave the name of* Argim, *from a Town that lies in a small Island near the Coast. The Sailors Charts called it also the Land of Galata. It is an extensive Country very barren and desert to this day, with Scarce any Towns or Villages. The Caravans from* Marocco *to* Nigritia *in travelling through that Country do not meet with Water several days, & are forced to load one half of their Camels with Water & provisions for their Subsistance. The Inhabitants like Arabs live in Tents moving from place to place, as they can meet with Pasture & Water for their cattle, & live chiefly by plunder & rapine.*

The Northern Islands of Africa *are* Madeira & y.e Canary. *The chief Towns in* Madeira *are* Funchal, Calcta *and* Machico. Funchal *is the Capital. It is the Seat of a Portuguese Governor, a Bishops see, it has a Cathedral & three Parish Churches besides several convents & Chappels of which the Jesuits was the most magnificent so bigotted are the Roman Catholicks here that they will not allow a protestant any Burial without paying very dear for the Permission. Madeira as said was discovered by one Robert Machin a native of Bristol in 1344. But the story is told so many different ways & has so much the air of a Romance that we cannot give much credit to it. Next to* Madeira *is Porto Santo. The* Canarys Islands *are seven in number of which* Palmas *is the Capital. It is the Residence of a Spanish Governor the Seat of a Bishop & has a beautifull Cathedral richly adorned besides several Churches & Convents. These Islands were very properly call'd Fortunate Islands by the ancients for by the concurrent testimony of Travellers there never was a richer Soil, or a more agreable Situation. There is nothing desireable in life but what is to be met with in that Terrestial paradise. Corn Wine Oil Flock Fish and Fowl abound in them, and that the most exquisite in every kind. They enjoy generally a clear Serene Sky and Temperate Air, for tho' they lie in a warm climate they are so constantly refreshd with sea breezes, that the Noon day heats are very tolerable and their evenings and Mornings inexpressibly pleasant. The poorest people here know no want of Cloathing, fruits, fruits or wines, But they are subject to Terrible Vulcanoes, and Earth quakes. in The Island of Tenerif is the Mountain call'd* The Pike *which is thought to be The Highest in the World it is Reckoned 2 miles & perpendicular and may be Seen 120 miles off at Sea. it is 3 Days Journey up to the top.*

ATLANTIC OCEAN

SOUTHERN and WESTERN PARTS.

I. **Yolofs's Country** *known by the general name of* Nigritia Proper. *This Country is Supposed to receive its name from the dark Complexion of the Natives. The River Niger which runs through the Middle of that* Country. *This mighty River discharges its Self into the* Atlantick Ocean *by several Mouths of which the three largest are 1st* Rio grande *or the great River. 2d the* Gambia. *3d the* Senegal. *It is upwards of 300 Miles between the most distant Mouths of this River, & all the Country between, except the rising Ground are annual by overflowed as the Delta in* Egypt *is by the* Nile *& much about the same time. the heads of the Nile & the* Niger *not being very far distant & the Rains that swell them falling at the same time. The* Portuguese *on first discovering of* Cape Verd, *fixed several colonies & Settlements on the* Niger, *of which they still retain three of* Cutcheo, Buisco *&* Bisago. *The* English *are in possession of the River Gambia where they have two Settlements one on Charless Island & the other on Jamess Island by the 10th Article of the Definitive Treaty concluded at Paris 10th Feb.y 1763. His most Christian Majesty as ceded in full right and Guarantie to the King of Great Britain the River Senegal with the Forts and Factorys of* St. Lewis, Podor *and* Galam, *with all the rights and dependencies on the said River. The New* English *Government of* Senegambia *begins at Cabo Roxo & extends to the North of the River Senegal. The* Dutch *have also some settlements on the* Gum Coast *all which formerly belonged to the* Portuguese. *The European Nations that have Factories on this Coast deal with the natives chiefly for Slaves tho they may sometimes meet with Gold, Elephants Teeth & Drugs. The Soil yields plenty of Rice, millet, Palm Trees, Cocoa Nuts, Herbs Roots, with Flesh, Fish & Fowl &c.* II. **Guinea** *takes its name from a Town call'd* Guinby *which the* Portuguese *touched at when they first visited this Coast in its largest extent it Comprehends* Slave Coast, Gold Coast, Ivory Coast *&* Grain Coast. *On the* Slave Coast *we find the Chief Towns & Principal Settlements* Benin *to the Negroes, Averry to the* Portuguese *who have a Castle & a Strong Garrison that Commands it. They have several Settlements in the Space of 170 Miles up the River, most of the Petty Sovereigns being their allies or Subjects. the lands of* Arebo *belong also to the* Portuguese. *Great* Ardras *& little* Ardras *are to the Negroes. Great Britain has Factories at* Whidah *& the* Portuguese, French *& Dutch have each of them one Settlement at the Same place. On the* Ivory *or* Tooth Coast *which takes its name from the Elephants Teeth found here the most remarkable places are* Jaque Jaque, Cape Lahou *and* Drewin *&c. On the* Grain *or* Pepper Coast *the chief Towns and Settlements are* Tabou, Great Golaw *the Great and* Little Sestro. *Here also are two English Settlements* St. Ann *and* Sherbro, *an English fort on* Yorke's Island. —— *Travellers usually make but two Seasons in Guinea: Winter and Summer, from April to September is their Winter or rainy Season, and from October to March their Summer. The most violent Storms are in July & August during which it is almost impossible to go on Shore. Rivers falling from high Mountains form so many rapid torrents, and in the wet Season overflow the vallies from whence Ascend thick Stinking fogs that make the Country very unhealthfull to foreigners. Our factors observe this people dont want Sense, but employ it to the vilest purposes, namely in defrauding all the Europeans they deal with: But our people confess that the christians here have in a great measure contributed to make them those exquisite cheats.* —— III. *CONGO. This Kingdom for the most part is Subject to the Portuguese and is divided in* Angola, Congo proper *and* Losango. 1st *The Kingdom of* Angola *contains several small States which our Mariners have given various names to, Scarce ever agreeing in the same name. The chief town and indeed of all the Portuguese Settlements here is* St. Paul de Loando *the Seat of their Viceroy. However they are not so much the masters of* Angola *as of the rest of* Congo, *for both the* English *and* Dutch *trade thither and* The English *Trading export abundance of Slaves from Angola.* 2d Congo proper, *the chief Town is* St. Salvador: *the Negroe King has a magnificent Palace in the middle of the Town as the Portuguese relate. There are also several Religious Houses and Convents.* St. Paul *and* St. Salvador *are both Episcopal Sees.*

Travelling Hours for the Caravan about two Miles & ½ English

Advertisement

The Inland Parts of Africa being but very little known and the Names of the Regions and Countries which fill that vast Tract of Land being for the Greatest part placed by Conjecture It may be judged how Absurd are the Divisions Traced in some Maps and why they were not followed in this.

3.d Loango. The chief Towns are Banza avari & Mayamba. Here the Negroe King lives in the Castle with the Portuguese Governor and is treated as a good ally but the Portuguese are in fact masters of this Town and Kingdom as well as of the rest of Congo except part of Angola. They enjoy exclusively the foreign trade of this Country except in some parts of Angola. They bring from thence chiefe Slaves, Elephants Teeth Wax and peltry. Carry there all manner of Cloathing, Linnen, Cotton, light Stuffs, Tools, Brandy and Tobacco &c. Negroes are purchased cheaper at Angola than in Guinea. Young Blacks at full growth and in their prime under three pounds a head, Boys & Women in proportion. These poor Creatures are packd as close as Herrings 7 or 800 in a Ship where they are forced to lie double almost the whole voyage and kept with no better food than Horse beans, the only people would induce the merchant to use them well for a Slave purchased for three or four pounds is worth 20 or 25 pounds in America.

WESTERN ISLANDS.

I.st These of CAPE VERD so named from their being Situated over against that Cape in Negroland. They where discoverd by Anthony Noel a Genoese in the service of Portugal in 1460 and are about 20 in Number, but some of them are only barren Rocks uninhabited. The largest of them is St Jago of a triangular figure 30 or 60 Leagues in Circumference. Rocky and Mountainous, but the valleys produce Indian Corn, Cocoa nuts, Oranges, plantain Roots & such other things as are common in hot Countries. Here we are supplyd in our voyages to India with Hogs, Goats, and Poultry in great abundance. Their Seas also abound with fish. Hither the English Shipping usually resort for Water and fresh Provisions, when they are outward bound to the East Indies. II.d In the Gulph of Guinea St Thomas, Annobon, or Good Year, Principe, or Prince's Island, and Fernandpo all which belong to the Portuguese. St Thomas Iland is the Principal. It was discoverd in 1571 on St Thomas day. It is about 40 Leagues in Circumference well Supplyd with Wood and Water, but the Heat and moisture of the Air is very unhealthfull to Northern Constitutions. The chief Town of the Island is Pavosan containing 3 or 600 Houses: it is the See of a Bishop. Prince's Island is remarkable for its abundance of Sugar Canes. Fernandpo Iland is about 30 Miles long and 20 Broad. Annobon Iland was discoverd by the Portuguese on New Years day 1571. The Dutch finding these Islands conveniently Situated for Trade & afford ing plenty of Provisions twice attempted to drive the Portuguese from St Thomas and easily made themselves masters of the Island. But loosing almost all their Officers, Sea men and Soldiers engaged in these expeditions, by malignant Fevers, they were obliged to abandon it Again and the Portugueses still remain in peaceable possession, the unhealthfulness of the Climate being their best protection against the avarice and Ambition of the greedy monopolizing Hollanders. III.d St Mathews Island is about 8 Leagues in Circumference. It was discoverd on St Mathews day by the Portugueses and settled by them but since deserted. IV.th Ascension Iland discoverd also by the Portuguese on Ascensions day is about ten Leagues in circumference. There is Scarce any Wood, Fruit Trees, plants or herbage upon it. However the European Shipping usually call here in their way from India and refresh their Crew with the flesh of Tortoises. V.th St Helena a British Island first discoverd by the Portugueses who gave this name on its discovery on St Helens day, but since deserted and afterwards Occupied by the English in 1600 etc. etc. till 1673 without interruption, when the Dutch took it by Surprize. However the English commanded by Captain Munden recovered it again within the Space of a Year and took three Dutch Ships that lay in the Road. St Helena is about nine and twenty Miles in Circumference. Here our Ships are Supplyd with Fresh Water, Cattle, Butter, Cheese, Hogs, Goats, Poultry & all manner of Provisions, the Soil is also Stored with fish. The greatest Inconvenience is that we are oft times Obliged to search for Fresh Water etc. etc. Ascension is destitute of Wood & Water, but abounds with Turtle & Sea Fowl. Here are Rocks and Stones to be seen all over the Island before the ground is cut up, and then these Rocks flourish, and afford grasse enough for the Cattle to feed on, & plenty of Water.

The Gold Coast is extended about Sixty Six Marine Leagues, beginning with the Gold River 9 Miles West of Allinee & Ending with the Village of Ponm about 80 Miles from Acra. It takes its Name from the vast quantity of Gold that is imported from the inland Countries, and Sold to the Europeans by the Negroes. The Shore itself producing but very little of that Mineral. The Dutch have the Principal Settlements on that Coast and their Town of Elmina may be looked upon as the Capital among the European Factories. Next to this is the English Fort and Factory of Cape Coast. The Soil of the Gold Coast is very fertile and abounds with all sorts of Fruit. The European Inhabitants never the less Complain very much of the unwholesomeness of the air, and give the worst character to the Natives. When their Trade is flourishing and the Inland Nations are in Peace it is Computed that they Export for about 230 000 l.b of Gold the two Thirds of which quantity are for the English and the Dutch. The Gold is generally found in two sorts of Places 1.st in and about some Rivers and Waterfalls whose Violence washes down great quantities of Earth which Carries the Gold with it. 2.d in particular Hills where the Negroes Dig Pits and separate it from the Earth. This Gold is of two sorts, one is called Gold Dust which is almost as fine as flower and is the Best. The other sort called Mountain or Rock Gold is in pieces of Different Sizes. The Negroes are very Subtle artists in the Sophisticating of Gold, and if we may believe the European Traders. They can so Neatly falsifie and Counterfeit Gold Dust and Rock gold that several unexperienced Factors are frequently Cheated.

A PARTICULAR CHART OF THE GOLD COAST

Wherein are distinguish'd all the FORTS and FACTORIES belonging to the Several European Powers.

from D'ANVILLE with many Additions

By S. Boulton.

The Land of Awine produces a great quantity of Gold and its Inhabitants are reputed the Civilest and fairest Dealers of all the Negroes.

SOUTHERN PARTS.

I.st CAFFRERIA proper or Western Caffreria. This Country was discovered by Admiral Diaz a Portuguese Officer, in his attempt to find a way to the East Indies round Africa about 240 Years ago. The Portuguese some Years after attempted to make a Settlement there, but the Inhabitants falling upon them and cutting in pieces several of their people, and there being no harbour for the Security of their Shipping against the violent Storms upon the Coast, they laid aside their design. The English afterwards visited the Cape and were discouraged from Settling there for much the same reasons the Portuguese quitted it, namely, the tempestuous Seas and the want of Harbours together with the untractableness of the People. However the Dutch observing the fruitfulness of the Country, and Judging that it would be of great use in supplying them with Provisions in their voyages to and from the Indies, fixed a Colony at the Cape about the 33.d Degree between Eastern and Western Caffreria. There the Dutch have remained ever since, enlarging their territories to that degree, that they have now Settlements upwards of 200 Miles well planted and cultivated.

II.d EASTERN CAFFRERIA or the Country of the Hottentots. This is very mountainous, but the top of the Hills as well as the Valleys are generally fruitfull. It is also adorned with groves of Trees, and a great variety of plants and flowers watered by little Rivulets that render it exceedingly pleasant during the fine Season. On approaching the Cape of good Hope three remarkable mountains are discovered. 1.st The Table Hill resembling a Square Table. A Cap of Clouds constantly covers the top of this Hill before a Storm & gives notice to the Sailors to prepare for it. 2.d The Lyons Hill, being infested with Lyons when the Dutch first Settled there. 3.d The Devils Hill, Supposed to be call'd so from the furious winds that blow from this rock when the top is covered with a white Cloud. These three Hills lie in form of a Crescent about the Table valley. The Hottentots Nations who inhabit this part are vast in number. The Coagemannase of these nations first traficked with the Dutch, and in consideration of some Brass Rings, Beads & other Trifles admitted them into that fine Country. Hottentots are rather low than tall, looking on a flat nose as a beauty, having Head and Eyes very large, lips naturally thick, Hair black and short as the negroes, exceeding white teeth, taking a great deel of pains with grease and Soot to darken their natural tawny complexion, very fond of wine, Brandy and Liquors. They remove their dwellings frequently for the conveniency of water and fresh Pasture, and encamp in a Circle formed by 20 or 30 Tents or rather Huts made with Slender Poles covered with mats or Skins. They are looked upon as the lazyest Generation under the Sun. They will rather Starve or eat dryd Skins or Shoe Soles than hunt for their food. And yet where they do apply themselves to the chace or any other exercise no people are to be found more active or dexterous. They worship the moon and adore a fly about the bigness of a Hornet.

Hottentots Women as in Guinea work and have the care of making the provisions for the Family. The more Wifes the Husband has, the larger life he leads. They have a little traffick among themselves. The poor Hottentots make Arms, Bows, Arrows, Lances, and Darts bartering them with the Rich for Cattle. Others get Elephants Teeth and Sell them to the Europeans for Wine, Brandy or Tobacco. Kolben relates that an Ox may be purchased of them for a pound of Tobacco and a large Sheep for half a Pound.

We Shall now give an account of the Cape Government and of the Revenues and profits at the Cape for Supporting the same. The Dutch Company bestowed vast Sums upon the Settlement before they could bring it into any perfection. It stood em for the first 20 Years in no less than a million of florins Yearly, one Year with another. — The annual expences of the Government are now about 400 000 florins and according to the last Dutch accounts the Revenues and profits at the Cape for defraying the same are hardly yet brought to a par with them so that one may easily Judge how much the Dutch Company are out of Cash at this Day on the Cape account. The application of the company in all this time for the Safety and interest of the Settlement and the Industry of the Dutch at the Cape in establishing fortifying &c are almost incredible. The Company's Servants at the Cape are divided into two classes called the Qualified and the Unqualified. The first are all the Officers in the administration with clerks and Store keepers under them. Unqualified are Soldiers artificers and common Servants. Here is the particular of the Salarys for both

The Governor allows the Governor in Salary & Board wages P.r Ann.m	3255 fl
To the Chief Merchant, the fiscal, the Captain, Store Keeper, to the three Preachers & Rhetor P.r Ann.m in all	11384
To the Ensign of the Garrison &c two these persons called under Merchants each 750 fl P.r A	9204
To the Lieutenant of the Garrison in Salary & Board wages P.r Ann.m	1004
To the Cook Surgeon & Undertakers of the Sick 13 persons each 315 fl P.r Ann.m	6669
To the Secretary & two Clerks each 534 fl P.r Ann.m	7080
To 4 Sergeants of the Garrison, the Masters of the workhouse overseers and under Officers for in all 10 persons	7780
To the Soldiers of the Garrison and common Servants in all 54 persons	75804
	120274 fl

Besides Salaries and Board wages the Company grant over allowances to the Officers and Servants and these expences stand as follows

	Yearly	
To the Governor		12000 fl
To the Qualified Servants		86874
To the Unqualified Servants		85674
		184 874 fl

We will now look into the Revenues and profits occurring to the Company from the Cape for the defraying of this vast expence first the Company has a tenth of the produce of all Lands possessed by Europeans & ground rents, the value of which is computed Yearly at 14000 fl

2.d The Company has laid certain Duties or wages on Tobacco Brandy and all other distilld Liquors, on Beer, on Mum &c all which are farmed of the Company Yearly at the rate of 70000 fl

3.d The Company lays out about 300 000 florins a Year in Merchandizes for the Cape. These may be reckond to Yield one with another a profit of 75 p.r Cent. The total produce then is Yearly. [illegible]

SOUTH EAST ISLANDS and PARTS

These Islands are the Islands of Comora, Mauritius or Isle of France, Island of Bourbon & Madagascar. These of Comora are five in number. Those which are most frequented by the Europeans are y^e Island's of Angazia & Anjoan where Ships touch for refreshments in their passage to Bombay and to the Malabar Coast. The people are Negroes of the Mahometan Religion extremely Hospitable, especially to the English. They live under a Monarchical form of government from which it seems the females are not excluded. Mauritius Island had this name by the Dutch in honour of their Stadtholder Prince Mauritius under whose Administration they made themselves masters of it. But having been obliged to quit it. The French took possession of it and gave it the name of Isle of France. The Isle of Bourbon by y^e French called England Forrest by y^e English who first discovered it, is of an Oval figure about 30 Leagues in Circumference, finely diversified with Mountains and Plains, has plenty of wood and Water and a fruitfull Soil. Captain Castleton an English Commander touched here in 1613 and was so taken with the beauty of the Island, that he gave it the name of the English Forrest, but our East India Company did not think it worth while to Settle it. The largest of the African Islands and Indeed of the whole world except that of Borneo is Madagascar Called by the Portuguese S^t Lawrence from its being discoverd on S^t Lawrences Day 1506. but Madagase or Madagascar is the name the natives give it. It is about a 1000 Miles in Length from North to South and generaly between 300 Miles broad. It is a fruitfull Country, but the Portuguese English Dutch and French after having Successively sent some detachements to explore the Country have abbandond it again. — III ZANGUEBAR Under this name are comprehended the Countries of Sabia, Sofala, Macaus, Mongalo and Zanguebar proper. The people on this Coast are Allies or rather Subject to the Portuguese. Their Country is very Barren affording scarce any Merchandize or Cattle unless a good breed of Horses which they Sell to the Portuguese who dispose of them again to the Arabs. Their complexions generally are a deep black with flat noses and thick lips. Melinda is a very large populous Town well built having a good Harbour commanded by a strong Citadel. Here the Portuguese have 17 Churches and 9 Religious Houses. Mozambique also is a regularly fortified place, where the Portuguese barter European goods with the natives for their gold, Elephants Teeth & Slaves & here their Shipping to & from India call for refreshments. Mongallo is also garrisond by the Portuguese & here is their chief Staple for European goods. The city of Mombaza is in Mozambique which the Portuguese posses'd themselves of, when they first visited the East Coast of Africa & being beaten out of it afterwards recover'd it again. The Portuguese have also some Little Settlements at Sofala. —

EASTERN PARTS

I. AJAN. This is a perfect desert coverd with Sand and Reeds producing scarce any Sustenance either for Man or beast, neither inhabited nor inhabitable no Harbour for Shipping or River that Waters any part of it. II. ABESSINIA and NUBIA ra vellers in Abeſsima reckon up nine provinces every one whereof has a distinct Sovereign that acknowledges the King of Abessima for the chief Lord. Capital Towns are Ambara, Amadora, Debra, Arguan &c. The people in general live here more in Tents than Houses: during three Months they have Terrible Thunders and almost continual Rain which falling from the Mountains that Surround Abeſsinia, in torrents Occasions the overflowing of the Nile in Egypt. The people are generaly healthfull living a good old Age, being of a deep Black, but their features are more agreable than those of the Negroes. The Jews are said to be the only Weavers and Smiths amongst them; and as for other Handicrafts Such as Carvenders, Taylors &c. every Man breeds up his Children to the Trade or profession he uses himself. They receive from the Turks & Arabs Silks Stuffs, Callicoes, Linen & Carpets they use for Furniture & Cloathing; and the Turks take in exchange Gold and emeralds with some fine Horses. ——— NUBIA, as well as Abeſsima is generally Comprehended under the name of Ethiopia. Nubia abounds in Gold, Musk, Sandal Wood, and Ivory. The Inhabitants were once Christians, there being the Ruins of some Christian Churches. Napata is their chief Town. Turks, Arabians, Jews and Armenians frequent this and the adjacent countries. — III. EGYPT called by Arabs Misrahim and by Turks El kebit is divided in Lower, middle and upper Egypt. LOWER EGYPT is almost contain'd in a triangular Island formed by the Mediterranean Sea and the branches of the Nile. The chief Towns are 1.st Alexandria built and enlarged by Alexander the Great. The Country about is a barren Sandy desert affording very little provisions or fruits. The Old Town of Alexandria was about 7 Miles of Circumference Excepting one long Street indifferently built and the Houses which face the Harbour the remains nothing but a heap of ruins at this day; Scarce any antient monument is left standing except part of the Walls which are yet magnificent. Many curiosities here are shewn to the Travellers as the ruins of the famous Pharos, Pompeys Pillar, St Catherines Stone, St Michaels Picture and that of St Mark &c. 2.d Rosett formerly the Palace of Cleopatra and her principal Residence. This is reckond one of the prettiest Towns in Egypt having a fine Piazza and several hans. There is also a Considerable Brick Trade and plenty of all things, but they want fresh water during some Months of the Year 3.d Damietta or Pelusium antiently a considerable port and Mansoura the most fruitfull part of Egypt. This Lower part had the greatest trade of any Country in the World when the rich Merchandizes of the East were brought hither by the Red Sea. — MIDDLE EGYPT has for its Capital Grand Cairo the Seat of a Turkish Beglarbeg. Built upon a plain on the front of a Mountain its Houses are built of Ill burnt bricks or Clay having flat terrasted Roofs. Their mosques are some of them very magnificent. Here are Josephs Wells. The Water of the Nile is very thick & Muddy especially when it's Swell'd by those heavy Rains which Constantly fall within the Tropick in the beginning of the Summer. These Rains are the occasion of its overflowing the low Lands of Egypt annually. While the River is contain'd within the bounds of the Ordinary Channel it is not broader at Old Cairo than the Thames at London. There are wont to be Rains Constantly upon the Nile rises to a Certain height for upon this depends the fruitfulness of the Country. It begins to Swell in May and the 18 of June they Publish in Cairo and other Towns by a Crier how much the Water is encreased between three or five Leagues the westward of Cairo on the other Side of the Nile stand the three first Pyramids so Justly the Admiration of all that View them. The Time when the Pyramids were built is not less uncertain than the founders names. Some think can be more precarious than the Egyptian Chronology where we find a Succession of Kings for 30 000 Years and they pretend to enumerate 330 more than 300 Kings who Reigned before their 100 Moons. The Mummy pits as they are called by our modern Travellers are in the Lybian desert, three or four leagues distant from the great Lye winds and a little to the westward of the place where the City of Memphis once Stood. These pits are Square and built of good Stones. We should not omit mentioning the Colossus or at least the head of one which stands near the largest Pyramid. It is usually Call'd Sphinx the upper part whereof resemble a Woman and the lower a Lyon, by which the Egyptians in their hieroglyphicks represented a Harlot intimating the danger of being Smitten with a faithless Woman.

UPPER EGYPT anciently Called Thebais or Thebaida and now Savd has for chief Towns Girge, Kous Akmin, Asuan or Sienne situated on the Nile. Kept once a great City from whence the natives obtaind the name of Copts. Most of the Towns of upper Egypt are now in Ruins or reduced to inconsiderable villages, the Trade being divested another way. Travellers intertain us with an account of the noble ruins they meet with there; vast columns of Marble and porphury, Statues and Obelisks of a prodigious Size with hieroglyphicks upon are found there.

THE EASTERN ISLANDS of Africa are those of Babelmandeb & Socotora the first is in possession of the Turks, and is now deserted being a Sandy barren Soil and affording Scarce any Sustenance for Man or Beast. It is about five Miles in Circumference. Socotora is about 20 Leagues long and 18 broad. the people of this Island are a mixture of Pagans and Mahometans and have Scarce any forreign traffick. See the Modern History or the present State of all nations by Mr Salmon Vol. XXVII from whence we have extracted for the most part what we have said about these Countries of Africa. ———

A View of the Lands from Cape Torment to the Butt

As it appears in sailing through the TRAVERS into the South Channel.

In sailing up the River to Quebec the Butt Z Y is discovered on the Meadows of Cape Torment, and the distant Mountains answer exactly to A B C D in such a manner at the Entrance of the Traverse that D appears with Z Y thus [D/Z Y] and at the end of it thus [D/Z Y].

DIVISION of SOUTH AMERICA with a SUMMARY ACCOUNT of its Trade.

SOUTH AMERICA is Divided into Nine Principal parts Viz.

1. Terra Firma *to the Spaniards*
divided into the Governments of

Panama, or Terra Firma *proper containing the Isthmus of Darien & the Adjacent Coast;*
Carthagena, St. Martha *and* Rio de la Hacha, Venezuela, Caraccas
Cumana, *or new* Andalusia, Paria, *capital of* Guayana, Popayan *with* Choco; *&the* New Kingdom *of* Granada, *whose Capital* Santa Fe *is the Metropolis of all* Terra Firma *with Several Islands belonging to the Spaniards, except* Curaçao *and* Bonaire, *both belonging to the Dutch. All along the Coast from* Carthagena, *there are Pearl Fisheries the Principal of which are at* Margarita, Cubagua, Cumanagotto *&* la Rencheria. *The whole Country abounds in Mines of Gold and Precious Stones. Indigo, Cochineal &c. The Trees that produce the Balsam generally known under the name of* Ballam of Tolu
35 *grow in the Government of* Popayan. *The City of* Panama *is the center of Commerce from* Peru *to* Chili. *As soon as ever the Galleons enter the Port of* Carthagena, *an express is dispatched over land to* Panama, *from whence he proceeds by Sea to* Lima. *In the mean time all the necessary preparations are made for carrying the Treasure as soon as arrived either by Sea or Land to* Porto-belo. *The Viceroy of* Peru, *on the other hand, makes all imaginable dispatch in sending the Ships that are to be joined by an* Armadilla *or small Squadron of Men of War to* Panama, *where as soon as here arrive are unladen & the Goods forwarded to* Porto-belo. *This may be performed two ways by Land which is a Journey of 16 Miles & a pretty good road in Summer, or by Water which is only made use of in Winter & then the Plate & Goods are conveyed to* Venta de Cruz *which is 20 Miles by Mules & then down the* Rio Chagre *into the Sea, hence they are transported to* Porto-belo *which is about 18 Leagues distant. These different methods of Carriage are of great utility, for in Summer* Rio Chagre *is frequently so low that Boats cannot pass & in Winter, when* Navigation *by that River is free, Road by land is altogether Impassable. As soon as the Lima Ships are unladen at* Panama *they sail to* Perico, *a little Island at a small distance from* Panama, *& there wait the return of the Europeen goods from* Porto-belo, *by the same Carriage that they were sent thither, & having taken this on board they immediately Sail away for* Lima.

2. Peru *to the Spaniards.*
Divided into the Audiences of

10 Quito, Lima *or* Peru *Proper, called the Royal Audience and* las Charcas *or Audience of* la Plata.
Peru *abounds in Mines of Gold & Silver, the most famous of which are the Mines of* Potosi; *in that Neighbourhood is the Town of* Porco *whose Mines are still richer, but harder to Work by reason of the Water that is found in them, whereas there is none in the Mines of* Potosi, *even at a very great depth. Nearer the Coast are the famous Mines of* Lipes *& towards the North those of* Oruro, *whence they draw a Fifth part of Silver from the Ore, besides many others. It may not be amiss to Observe that when Mines are shut up, & no longer wrought, we must not Suppose that they are totally lost for after a considerable Space they open them, & draw from them fresh Riches, sometimes in greater quantities than at First. The Town of* Arica *is the proper Port of* Potosi & la Plata. *In the Month of March they begin to bring Silver from thence to* Arica, *& in June the Fleet from* Lima *comes to Fetch it. There is a Constant intercourse between* la Plata, Lipes, Oruro, *& this Port, by land for conveyance of which there are Inns at every Thirty or Forty miles insomuch that it is computed there are two Thousand Persons employed in the Management of these Inns and as Carriers.*
15 Lima *called also the* City of the Kings *is the Capital of all* South America, *as well as of* Peru, *& the residence of the Viceroy. Its Inhabitants have been so rich that in 1680, on the entry of the* Duke de la Plata, *their Viceroy, they paved two of the Streets thro' which he passed, with Ingots of Silver to the amount of Eighty Millions of Pieces of Eight, which is about Eighteen Millions Sterling but they are not conceived to be near so rich at present. Callao is the Port of Lima; its road is by much the largest & Surest in the South Seas. There are two Flottas annually Sail from thence, one for* Arica, *the other for* Panama. *The former Sails about the end of February, & having received at* Arica *the Silver sent from the Mines, returns towards the end of March. In the beginning of May the Fleet Sails for* Panama, *having on board the Wealth from* Potosi, *the Silver from* Chili, *which comes in the Valparaiso Fleet, the Kings revenue & Merchandizes from all parts of* Peru *and the Audience of* las Charcas; *and on the return of this Fleet laden with European Commodities they are dispersed from thence, part by Sea & part by land, to all the different places to which they are destined. Besides these Fleets, there Sail Annually two Ships for* Acapulco; *& the Indian Commodities which they bring are all deposited in the Magazines at Callao and sent from thence to all the Southern Provinces of America.*

3. Amazonia, *above the Spaniards and Portuguese have Missions & Settlements very little known;*

it takes its name from the River Amazon *that runs thro' that immense Country from West to East, the Course of that River was drawn in 1743 & 44 by M^r. de la Condamine.*

4. Guayana, *divided between the Spaniards Dutch & French.*

Spanish Guayana *is comprehended in* Terra Firma.
Dutch Guayana, *contains the Colonies of* Essequebo, Berbice *and* Surinam.
French Guayana, *contains the Colony of* Cayenne, *with Several Forts & Settlements.*
The Dutch & French cultivate Coffee, Cotton, Sugar, Roucou or Annatta & Cocoa.

5. Brasil, *to the Portuguese.*
Divided into 10 Captainships viz.

55 the Bay of all Saints, Seregipe, Olinda, Paraiba, Riogrande, Seara, Maranham & Para, as Illheos, Porto Seguro, Spiritu Santo & Riojanuiro, *with the Countries of* St. Paul *& of the* Mines.
The Portuguese in the Northern Captainships are Masters of all the Coasts and 10 or 12 Leagues up

in the Country, but in the Southern Captainships their Settlements extend a Great Deal further in the Interior parts of the Land. Brasil, produces Gold, Tobacco & the best Sugar in great Plenty. Some years since the Portuguese have Discovered several Mines of Diamonds which are very Rich, & those perfections are almost as fine as those of the Mines of Asia.

6. Paraguay, *to the Spaniards.*
Divided into the Great Governments

of Assumption, *whose Eastern part is the Province of* Chaco.
of Buenos-ayres.

The Spaniards are become the absolute masters of that Country since the expulsion of the Jesuits who had established there an Independant Government, under the pretext of converting & civilizing the Indians. Paraguay abounds in very rich Mines both of Gold & Silver; there is besides plenty of Valuable Commodities, especially the Herb Paraguay. *The use made of it is to compose a Certain Drought Infusion or Tea which recovers such as Work in the Mines from those grievous Chelicks & intolerable disorders in the Stomach caused by the exhalations in such places. The amount of this Trade is at least a Million & a Half of Pieces of Eight per Annum. By the Help of* Rio Pilcomayo *there is a quick & Streight passage from* Potosi *to* Buenos-ayres, *and a good Road thither also by Land. The importance of* Buenos-ayres *consists chiefly in its Convenient Situation for Commerce, indeed for such a Commerce as the Port in the* Spanish Indies *can boast of the like Hitherto could, even from the most distant Provinces the most valuable Commodities in order to be Exchanged for European Goods, such as Spanish West Indies in all parts of Peru, and* Chili, *Copper from* Coquimbo, *Gold from* Chili, *& Silver from* Potosi, *Tobacco Sugar, Cotton thread, wax, Cotton Cloth from* Paraguay. *The Herb of that name is transported from* Santa fe *to* Potosi, *partly in Baggage & partly on Mules and tho' it be a Journey of five Months, Europeans yet they commonly perform it in a Month. They dispose of the Herb for ready Money, & generally gain upon it Cent per Cent. The Journey to the Mines of* Chili *is much more troublesome because the passage thro' the Mountains which divide that Country from the Inland parts of America, is passable only from December to March. The Commerce between* Buenos-ayres *&* Peru *is chiefly for the Sale of Cattle & of Mules for the Mines. The Trade carried on between* Buenos-ayres *&* Europe *ought to be only by Register Ships from* Spain, *but besides these, the Inhabitants carry on a great Contraband Commerce.*

On the North Side of Rio de la Plata, *in* Paraguay, *the Portuguese have a Colony called* Colonia do Sacramento *which was granted to them by a Treaty with the Spaniards in 1750.*

7. Tucuman *to the Spaniards.*

8. Chili *to the Spaniards.*
Divided into three Districts, Viz. those of
Chili proper, Imperiale *&* Chicuyto.

This Country abounds every where with Gold, Silver, Copper, Lead, Mercury, Saltpetre & Sulphur, & from such parts of it as the Spaniards have thoroughly Settled, they reap Immense Profits. The Soil is Wonderfully Fertile. Producing not only Indian but European Corn, Wine, Fruits & all the Necessaries of Life in abundance: Whatever Herbs, Fruits or Flowers grow in Spain, are Cultivated with Success here, & we learn from the Accounts of the latest travellers, that in the Gardens of the Cities near the Coast, Orange trees are Kept bearing all the Year. The Richest part of Chili is still in the hands of the Natives, & like to remain so, their Mountainous Situations affording the Indians such Advantages, as the Europeans, considering the small Number can hardly ever surmount In the mean time the Governors run away with greatest part of the Wealth accruing from this Important Settlement the King on the one hand hears daily the cries of his revenues and on the other pours profitless Salaries; so that smaller returns are made to Spain, in the Kings Account from hence that can well be imagined. It must however be owned that within these Twenty Years, some pains have been taken to Remedy this Abuse.

9. Patagonia, *or the Country of the* Gyants Patagons, *with the* Magellanic Islands.
known under the names of Tierra del Fuego *&* Falklands Islands.

Tierra del Fuego, *or the land of Fire, so named from a Burning Mountain that is seen at a great distance, is a Desolate & Barren Country.*

The Isles of Falkland *belong to* Great Britain *by Right of first Discovery. The English have a Fort & Settlement at* Port Egmont *in* Saunders Island, *on the North of the Western Falkland, & the Spaniards have a Fort in the Eastern Isle. As* Port Egmont, *is a very safe & capacious Harbour, it will become of great utility to the British Navy & even Privateers, in any future War, to annoy the Spanish Trade in the South Sea.*
